for organic plant production*

GROWING MEDIA CONSTITUENTS

LIGNOFIBRE:

Sustainability and expertise for a healthy and economic plant production

Our regional organic wood fibre **LIGNOFIBRE** is an eco-friendly resource which complements our North German peat perfectly and is particularly suited for the high demands of the professional horticulture. Accompanied by our experienced consultants, this innovative product ensures a successful cultivation of high quality plants. Moreover, **LIGNOFIBRE** provides an important contribution to the conservation of our nature and environment.

- ① **renewable regional resources**
- ② **well-balanced air capacity**
- ③ **good drainage characteristics**
- ④ **fast re-wettability**
- ⑤ **high structural stability, low shrinkage**
- ⑥ **uniform supply**
- ⑦ **low fixation of nitrogen**
- ⑧ **meets RAL quality criteria for wood fibres**
- ⑨ **approved by EC organic standard No 889/2008**
